GoPod® Gear Garage

Twin IT Smart Ski/Snowboard Lockers for Duration-of-Stay or Seasonal Rental

Taking Smart Storage to New Peaks

Building on the exceptional smart-rental capabilities of our award-winning GoPod® locker systems, our new GoPod® Gear Garage brings smart storage slope-side with a bevy of fully optimized features to meet the specific needs of skiers and snowboarders. These large-volume, stow-and-go lockers are fast, easy, convenient and secure – combining expert-level storage tech with a rental process that’s easier to navigate than the bunny slopes – because the only thing slowing your guests down should be the moguls.

Keep Your Flow Tight & Your Revenue Rolling

Serving as a one-stop sales/rental center to eliminate long lines and traffic jams, GoPod® Gear Garage is a complete locker solution system that generates revenue, enhances your amenities and keeps guests moving. What’s more, our popular No-Cost-to-You Revenue Share Plan features tailored options to maximize profits while reducing labor and employee cash handling. In short: You get to carve out a fresh new revenue run, and guests get to keep their valuable gear dry and secure until they’re ready to get shreddy!

Extreme Durability

High-Density Polyethylene (HDPE) construction is UV resistant, perfect for wet conditions & more rugged than the most difficult terrain.

Expanded Dimensions

Proprietary XL “top hat” extender provides air flow along with ample space to accommodate even the longest skis, offering an ideal solution for both short- & longer-term (seasonal or duration-of-stay) full-equipment storage.

Equipment Hanger System

Versatile, highly configurable stainless-steel racks offer total gear management for accessories (boots, poles, helmets, etc.) PLUS skis & boards.

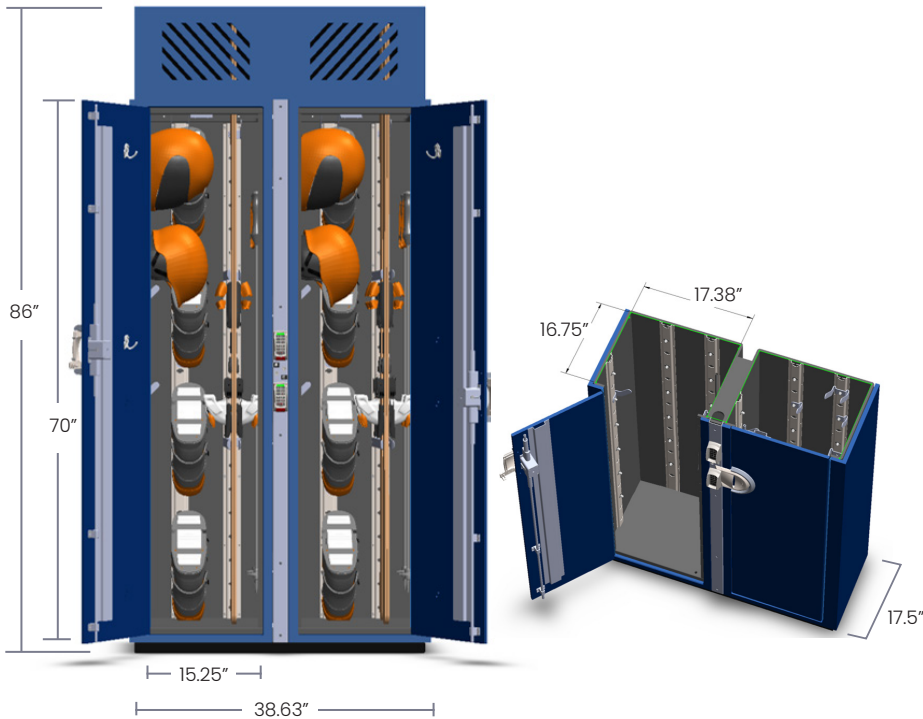

Multipoint Lock

Unique single-action, three-point locking mechanism engages at the top & bottom of each door as well as at the handle for tamper-proof security.

Easy-Loader Functionality

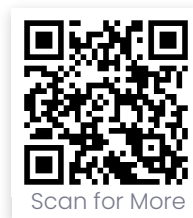

Heavy-duty doors can remain open for hassle-free accessibility & utility (vs. springloaded auto-close hinge designs).
