VENU+ Foldable Wagon

Purpose Built for Commercial Fleets

The VENU+ Foldable Wagon is a heavy-duty, collapsible wagon engineered specifically for fleet use in attractions and leisure environments. Designed for durability, ease of operation, and efficient storage, it combines robust construction with a compact folding design to support high-volume, day-to-day use. With design refinements proven in large-scale park operations, the VENU+ Foldable Wagon delivers a reliable, long-term mobility solution for guest transport.

- **Fleet-Grade Durability**
  Heavy-duty frame with hardened composite panels for improved strength, impact resistance, and longevity over traditional wood.
- **Fully Collapsible Design**
  Folds quickly for compact storage, reducing back-of-house space and simplifying logistics.
- **Built for Daily Use**
  Engineered for intensive operation across theme parks, zoos, and holiday parks, with components selected to minimise maintenance.

- **Smooth & Stable Handling**
  Designed for easy manoeuvrability across park surfaces, even when fully loaded.
- **Operational Efficiency**
  Delivered pre-assembled, reducing installation time and on-site labour costs.
- **Proven in Fleet Environments**
  Design refined through real-world operation in large park fleets, addressing common issues seen with off-the-shelf wagons.
